Coax, Fiber Optic & Copper Installation

Who is the Transseed Group?

Transseed Group, is a leading provider of state-of-the-art communications technologies that efficiently services commercial and government organizations worldwide. We assist our clients with designing, engineering and deploying communications infrastructure while providing value and integrity in each engagement.

Transseed considers itself a leader in value creation for each stakeholder. Each project we engage has an emphasis on safety, quality and professional communication to protect the investment of the client. Using cutting edge technology, coupled with over 30 years of experience, our company focuses on industry standards and seven fundamental values to stay ahead of the competition. These values are: Diversity, Shared Ownership, Common Purpose, Loyalty, Passion, Entrepreneurialship and Risk Management.

Headquartered in Houston, Texas and with field operations in the Carolinas, our Project Managers and Team Members are ready to support your business needs from coast to coast. We have the expertise to service a wide variety of projects working with small businesses to Fortune 50 companies within 22 countries. With today's evolving economic climate, you need a company that can embrace change, identify industry trends and communicate with your staff as we grow together. *Let us be "your total solution for underground services"?*

Project Management:

Transseed's Project Management team finds its success from a 30 year history of field management experience, military leadership and a Project Management Institute (PMI) pedigree. Our extensive stable of Project Managers have serviced various technical and non-technical clients throughout the globe.

Safety First

Transseed has a no tolerance policy. We take your worksite serious as we institute a "safety first" culture. Site Foremen, Project and Construction Managers are trained to ensure that procedures are in place that follow the construction OSHA, Comtrain, EIA/TIA standards are met each day. This includes tailgate meetings, daily and weekly reports.

When it comes to outside plant construction, the integrity of the entire project matters. We zero in on more than just production, our management team has a hands on approach and our clients can trust the work ethic each employee brings to the table. We take pride in our superior communication, relationship management and the customer service that builds trust with our clients. Our goal is to build a foundation from repeatable processes, measurable activities and excellent workmanship.

OSP Equipment List:

- Directional Drills
- Trenchers/Vibratory Plows
- Missiles
- Industry Standard Signage
