# Who is Transseed Group?

**Transseed Group**, is a leading provider of state-of-the-art communications technologies that efficiently services commercial and government organizations worldwide. We assist our clients with designing, engineering and deploying communications infrastructure while providing value and integrity in each engagement.

Transseed Group considers itself a leader in value creation for each stakeholder. Each project we engage has an emphasis on safety, quality and professional communication to protect the investment of the client. Using cutting edge technology, coupled with over 30 years of experience, our company focuses on industry standards and seven fundamental values to stay ahead of the competition. These values are: Diversity, Shared Ownership, Common Purpose, Loyalty, Passion, Entrepreneurialship and Risk Management.

Headquartered in Houston, Texas our Project Managers and Team Members are ready to support your business needs from coast to coast. We have the expertise to service a wide variety of projects working with small businesses to Fortune 50 companies within 22 countries. With today's evolving economic climate, you need a company that can embrace change, identify industry trends and communicate with your staff as we grow together. ***Let us be "your total solution for wireless telecom services!"***

# Telecom Wireless Solutions

**Not matter the scope and size of the project, Transseed Group professionals are dedicated to going above and beyond your deliverable expectations.**

**Transseed Group** provides turn-key infrastructure and communications services. Our telecommunications/wireless crews have serviced ISP/OSP network and tower projects throughout the U.S. We employ qualified and certified personnel who are comfortable working with all carriers and tower construction companies delivering world class solutions. The Transseed Group Team has **"SAFELY"** and successfully deployed network systems using cutting edge protocols, testing units, while constantly taking the necessary measures to stay compliant with OSHA guidelines. Technicians and Engineers at Transseed Group deploy and integrate UMTS, RF Microwave, GSM and LTE systems within monopoles, lattice towers, rooftops and base shelters. We take pride in knowing that our personnel are experienced and capable of working with your managers while developing real time solutions on site.
